5. Prioritization

Release Burnup Chart

Hey, Let's Practice 😊

Some Math ☺

- Backlog = 1000 pts
- Iteration length = 2 weeks
- Team commitment = 100
- Focus Factor = 10%
- Velocity = $100 * 10\% = 90$ pts
- MVP = 270 pts
- MVP length = $(270 \text{ pts} / 90) = 3 \text{ iterations} = 6 \text{ weeks}$
- Project Duration = $1000 / 270 = 3.7 \text{ Releases} = 4 \text{ Releases} = 32 \text{ weeks}$

Splitting / Slicing

- *Operations*
- *Different inputs*
- *Simple to Complex*
- *Workflow*
- *Role*

Why Split User Stories?

Splitting Practice

Workflow

As a Customer, I
want to create an
order so that I can
get something to
eat

Operation

As a restaurant
owner I want to
manage my
restaurant profile
so that people can
order from my
restaurant

Role

As a customer I
want to create an
order so I can get
something to eat.

Splitting Practice

Workflow

As a Customer, I want to create an order so that I can get something to eat

As a customer I can view the items on the menu

As a customer I can select the items I want in my order

As a customer I can review my order.

As a customer I can submit my order

Operation

As a restaurant owner I want to manage my restaurant profile so that people can order from my restaurant

As a restaurant owner I can create a restaurant profile

As a restaurant owner I can update a restaurant profile

As a restaurant owner I can view a restaurant profile

As a restaurant owner I can delete a restaurant profile

Role

As a customer I want to create an order so I can get something to eat.

As a customer I want to create an order.

As a restaurant owner, I want to create an order for a customer

Acceptance Criteria

Customer's DoD (Gherkin format - Given/When/Then)

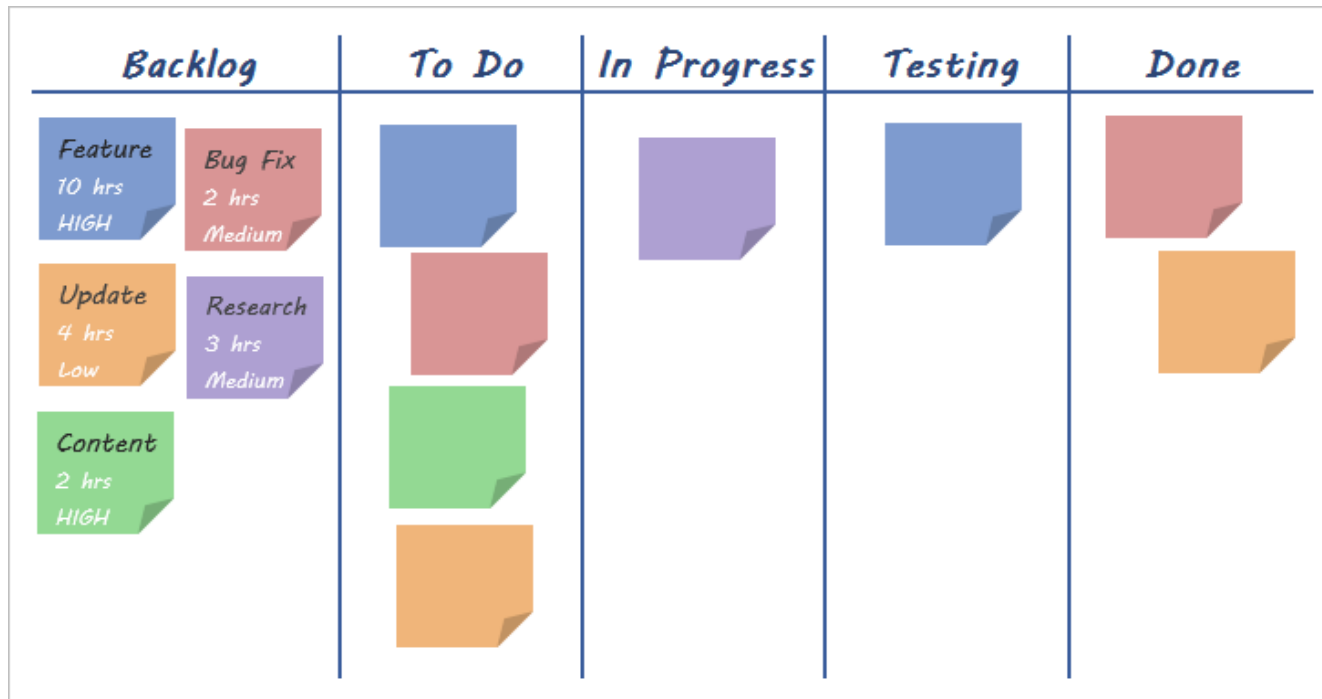

- *Given: A customer on the checkup page on the site*
- *When: A customer enter a valid number*
- *Then: the system will send a customer an email confirmation*
